

LINE UP

Finished Quilt is 40 x 52.5

There are 80 squares, all the same color and 80 rectangles of varied colors.

YARDAGE: 1 yard gives you enough to cut the 80 squares with some extra.

CUT

Cut 7 3 inch wide strips the width of fabric and remove selvages. (depending on selvedge and your cutting accuracy, 6 strips may be enough.)

Cut into 80 squares. 3 X 3

Cut 80 rectangles from varied fabrics. 3 x 8

SEW

Sew one square to each rectangle.

Because this is scrappy, the blocks need be laid out on the floor or design wall before you start sewing the rows. You will probably need to move the blocks around a bit to get a layout that looks well-distributed.

When you have them the way you like, alternate the direction of the strips when you sew the row together. There are 16 strips in each row. Sew all five rows together, matching up the corners.
